The scene is Bremerhaven, the year is 1872. Fleeing the squalor and crippling poverty of his home village, young William embarks the Columbia bound for America. Among his few belongings is a sketch-book to which he commits his various observations on board the ship: the hard work of the sailors, daily tribulations such as vermin or the friction due to overcrowding 'tween-decks, rough seas and dead calm. On a brighter note, there are pleasant scenes such as children playing or the nocturnal phenomenon of marine phosphorescence. At last the big day has arrived: The Columbia berths at the Port of New York!

This magnificent account of life on board of a sailing ship in the great era of emigration contains exciting snippets of information as well as gorgeous illustrations that will leave the young reader panting for more.
