While this is cause for delight among many nature lovers, it's cause for concern and fear for others. The wolf has grown unfamiliar: this beautiful native animal was forced out of our forests for many years. How can we rethink our relationship to wolves now that the number of wolf packs in Germany and neighboring countries is increasing?

Following the belief that understanding is the way to conquer fear, this atmospherically illustrated fact-based book introduces the reader to the life of a family of wolves.

We trace the footsteps—or paw prints—of a young wolf, see how a wolf pack is initially formed, learn about life within the pack, and experience how the next generation of wolves leaves the pack and sets out on its own. Inside the large-format flaps there are attractive infographics and texts that explain facts about wolves' biology and how to interact with them.

- With 10 large flaps that open in all directions
- Contains many facts about the biology, life, and behavior of wolves, as well as maps that show its habitats in Germany and Europe.

Bärbel Oftring

born in 1962, studied biology and worked as an editor in the garden and nature departments of a large publishing company. Today she works as a freelance author and editor. As an author of over sixty books, she especially loves communicating astounding, interesting, and valuable information about nature and the environment to children. Not accidentally, she is also an outdoor and experiential educator. Oftring published the volumes Wald and Wale und Haie in Gerstenberg's series Lesen—Staunen—Wissen.

Theresa Schwietzer

The Illustrator, born 1988 in Hamburg, studied Illustration and Graphic Design in Münster. She now works as a freelance illustrator and graphic designer and lives in Hamburg.
