They usually frolic in flocks, scolding vociferously, always eager to investigate their surroundings – sparrows are just like children, and maybe that is why children love these cheeky birds so much! This beautifully illustrated picture book takes us on a guided tour of the life of the sparrows throughout the year. We watch their “wedding” and their subsequent search for a suitable nesting place, and we’ll see the little sparrows hatch, to be reared with unfaltering care and attention. Eventually they’ll embark on their first exploratory forays, and soon start looking for food in the city, just like their parents. And when spring comes round again, they’ll have to look for a nesting place of their own.

Following his previous book “Many Swallows Make a Summer”, Thomas Müller provides fascinating, easy-to-grasp insights into the lives and habitat of sparrows, complementing his facts with lovingly drawn pictures of our feathered friends.
